Corporate Presentation

May 2026

PMET Resources and Shaakichiuwaanaan Overview

Shaakichiuwaanaan Project:

Rare Geology of Global Significance

Shaakichiuwaanaan represents an extremely rare type of Lithium-Caesium-Tantalum (LCT) pegmatite deposit — that has concentrated all three of the LCT components at scale and grade, for critical minerals that are in **high demand**.

This deposit stands among the very few globally that has the potential to **produce all three critical minerals** via relatively simple processing, creating a **unique value proposition** in today's critical minerals market.

Shaakichiuwaanaan Project

Top 10 largest lithium¹
pegmatite resource globally and
the largest hard-rock lithium
reserve in the Americas

The world's largest pollucite-
hosted caesium pegmatite
resource¹

One of the largest tantalum
pegmatite resources globally¹

**Simple, physical recovery
methods expected to** lead to
low operating costs, less risky
and faster ramp-up of large-
scale, globally-relevant
production of three critical
minerals.

**Proven, successful
management team, with
C\$182M of cash on balance
sheet** to advance exploration
and development towards
FID.

1. The Consolidated MRE (CV5 + CV13 pegmatites), which includes the Rigel and Vega caesium zones, totals 108.0 Mt at 1.40% Li₂O, 0.11% Cs₂O, 166 ppm Ta₂O₅, and 66 ppm Ga (Indicated), and 33.4 Mt at 1.33% Li₂O, 0.21% Cs₂O, 155 ppm Ta₂O₅, and 65 ppm Ga (Inferred), and is reported at a cut-off grade of 0.40% Li₂O (open-pit), 0.60% Li₂O (underground CV5), and 0.70% Li₂O (underground CV13). A grade constraint of 0.50% Cs₂O was used to model the Rigel and Vega caesium zones, entirely contained within the CV13 Pegmatite, with a MRE of 0.69 Mt at 4.40% Cs₂O, 2.12% Li₂O, and 646 ppm Ta₂O₅ (Indicated), and 1.70 Mt at 2.40% Cs₂O, 1.81% Li₂O, and 245 ppm Ta₂O₅ (Inferred). The Effective Date is June 20, 2025 (through drill hole CV24-787). Mineral Resources are not Mineral Reserves as they do not have demonstrated economic viability. Mineral Resources are inclusive of Mineral Reserves. See Slides 31-36 for further details.

Proven Management Team

Built Pilgangoora (PLS) and mines in the north, now building Shaakichiuwaanaan

Ken Brinsden

CEO, President, Director
B.Eng. (Mining),
MAUSIMM, MAICD

YEARS

Over 30 years

EXPERIENCE

CEO & MD, Pilbara Minerals

ACHIEVEMENTS

Developed Pilbara Minerals from exploration to production, with company growth rising to achieve ASX top 50 companies' status

Natacha Garoute

CFO
CPA, LLB

YEARS

Over 20 years

EXPERIENCE

CFO, Champion Iron Ore
CFO & Corporate Secretary,
Roxgold

ACHIEVEMENTS

Extensive experience in Quebec in financial and capital markets, raised. \$1B + financing for developers and producers

Frédéric Mercier-Langevin

COO/CDO
Eng., M.Sc

YEARS

Over 20 years

EXPERIENCE

COO, Wesdome Gold Mines,
General Mine Manager, Agnico
Eagle

ACHIEVEMENTS

Led IBA negotiations with First Nations as COO, ramped up from commissioning to production a 380koz/annum gold mine in Canada's north.

Darren L. Smith

Executive Vice President, Exploration
M.Sc., P. Geo

YEARS

Over 20 years

EXPERIENCE

Strong focus on rare earth elements, and rare metals (Li, Ta, Nb). Director, VP Exploration, and Sr. Technical Advisor for several junior mineral exploration companies

World-Class Partners Validating the Opportunity

Three landmark strategic relationships — with global leaders in battery materials, electric mobility, and specialty chemicals — confirm institutional confidence in project quality and long-term commercial viability.

Aug 2023 — Albemarle

C\$109M Strategic Investment

The world's largest lithium producer made a landmark C\$109 million strategic investment for 4.9% of the company, providing both capital validation and global lithium raw materials market credibility.

Dec 2024 — Volkswagen / PowerCo

Strategic Investment + Long-Term Offtake

Volkswagen invested C\$69M for 9.9% of the company at a 65% premium to prevailing market prices, while its battery subsidiary PowerCo secured a strategic long-term offtake agreement.

Apr 2026 — Koch Technology Solutions

Downstream Processing Relationship

Koch Technology Solutions brings proprietary critical minerals processing technology, downstream expertise and downstream commercial relationships in the critical minerals sphere.

C\$178M

Strategic Investments

Key funding by global players to accelerate project development

3

Tier-1 Collaborations

Albemarle | Volkswagen / PowerCo | Koch Technology Solutions

2027 FID

Fully funded until FID – targeted 2nd half 2027

Strategic + institutional funding to have financing visibility until FID

Positioning To Become a Top 5 Producer Globally

Our CV5 Lithium Only Feasibility Study (FS) targets ~ 800 ktpa and positions the Company to become the 4th largest spodumene producer of SC5.5 globally¹ and largest in the Americas.

Uniquely positioned to supply North American, European, and Asian supply chains for ~20 years with coarse grained (**DMS**), high-quality SC5.5% spodumene concentrate.

Source: Company disclosure. 1. Refer to Annex for supporting information. Notes: Production figures have been adjusted on a 5.5% Li₂O equivalent basis. Greenbushes and Pilgangoora production capacity excludes expansions pending FID (i.e. Chemical Grade Plant 4 & P2000, respectively). Capacity refers to current installed production capacity, and where not available, average annual production.

Our Development Strategy

Optimize and Deliver on our Lithium Operation

Up to ~800 ktpa SC5.5¹

A staged development for a lithium only, open pit and underground spodumene mining operation, at CV5

Simple geology, mining, and pegmatite geometry with very high-grade subsets of the Mineral Reserve
~12.1Mt @ 2.0% Li₂O^{2,3}

- ✓ Conventional DMS-only processing flowsheet
- ✓ Low in Fe and other impurities
- ✓ Proximal to already-built, high quality power and transportation infrastructure

Unlock Additional Value from Other Critical Minerals

Caesium and Tantalum Co-Products

- ✓ Extract greater value by expanding production into other critical minerals over time, including caesium and tantalum as co-products
- ✓ World's largest pollucite-hosted caesium pegmatite resource⁴ at CV13
- ✓ One of the largest tantalum pegmatite resources globally⁴

Diversify Downstream into Chemicals

Lithium and Potentially Caesium Chemicals

Participation in future midstream and downstream processing opportunities to capture additional value along the chemical supply chain

- ✓ Opportunity to provide a lithium-enriched intermediary product or purified chemicals into the burgeoning North American, Asian, and European battery industry
- ✓ Potential to establish midstream and downstream processing expertise through strategic partnerships with industry participants, including the potential to use low-cost renewable power with electric calcination
- ✓ Opportunity to develop an independent downstream lithium and/or caesium chemicals supply hub in North America supporting emerging supply chains

1. See Feasibility Study for CV5 news release dated October 20, 2025. 2. Project hosts a Probable Mineral Reserve of 84.3 Mt at 1.26% Li₂O (all within the CV5 Pegmatite) at a cut-off grade of 0.40% Li₂O (open-pit) and 0.70% Li₂O (underground). Underground development and open pit marginal tonnage containing material above 0.37% Li₂O are also included in the statement. Effective Date of September 11, 2025. 3. Includes the high-grade Nova Zone (~12.1 Mt at 2.0% Li₂O on a fully diluted basis, factoring in mining recovery, which is a subset of the overall Probable Mineral Reserve). 4. Refer to Annex for supporting information.

From Discovery to Development-Ready: Technical De-Risking

A systematic progression of geological validation and resource definition — from initial discovery through a Feasibility Study in less than 4 years — demonstrating increasing project maturity and confidence across every technical dimension.

Each milestone represents a deliberate de-risking step — moving from geological hypothesis to bankable feasibility. The accelerating pace of achievements from 2023 onward reflects compounding technical confidence and resource growth momentum.

Co-Product Opportunities

- a key point of difference for PMET

Co-Products – Tantalum

Concentrate Price at 20-Year Highs

Tantalum presents a significant opportunity to realise additional revenue beyond primary spodumene concentrate production. This high-value metal has potential to meaningfully enhance economics when integrated into the project. An **updated Feasibility Study for CV5 is scheduled for late 2026, which will integrate tantalum as a co-product.**

Tantalum Market

Tantalum concentrate spot prices¹ are currently around **US\$202/lb**

Tantalum's current supply base is **heavily reliant on the DRC and Rwanda (65%)²**, with non-conflict reliable long-term supply sources highly sought after

Total tantalum ore raw materials market is approximately **US\$600M at US\$100/lb**, and demand estimated to double in size over approximately 10 yrs³

30% Tantalum Ore, USD/lb (CIF China)

Source: 1. April 28th, 2026, Bloomberg; 2, 3: Tantalum Quarterly – CPM Group, January 2026

Current and Future Uses of Tantalum

- **Tantalum applications are very much technology oriented.** It remains a key component of chip manufacturing due to its advantageous chemical and mineral characteristics
 - Over 65% of the demand is directly tied to the chip manufacturing industry¹
- **Tantalum is a key input for AI data centers and cloud servers.** For example, **Nvidia's H100 cards, requires as many as 25 tantalum and tantalum-polymer capacitors per board**² due to their stability at high operating temperatures and miniaturized footprint
- It also benefits from **EV adoption**, as it is used in cars' onboard electronics for extreme miniaturization, high-temperature stability, and exceptional reliability in harsh environments
- **Tantalum demand CAGR:** Global commercial tantalum demand is forecast to grow at an overall compound annual growth rate (CAGR) of 6.3% through 2036, rising from 2,688t Ta in 2025 to **5,270t Ta by 2036**³
 - Doubling the market size at current prices of \$250/lbs, the tantalum market would be approximately **US\$2.9B**

Application	Market Size (Est. 2025): 2,688t Ta	Market Characterization
Capacitors	30% of demand	Critical for AI data centers and EV electronics.
SAW Filters	20% of demand	Wireless communication devices (5G).
Sputtering Targets	15% of demand	Advanced semiconductor manufacturing.
Superalloys	15% of demand	Aerospace jet engines and land-based turbines. Defence.

125	971

Source: Peloton Capital

Source: 1, 3: Tantalum Quarterly – CPM Group. January 2026; 2, Argus Media: Q&A: AI drives fresh Ta capacitor demand, October 2025

Co-Products – Caesium

Caesium is a niche, supply constrained commodity which presents another potential revenue opportunity at CV13, beyond primary spodumene concentrate production. This high-value metal has the potential to enhance project economics through recovery of pollucite concentrate at site and is expected to be integrated via a primary crush and simple, XRT ore-sorting process flowsheet.

PMET expects to deliver a **PEA-level study for the broader Project (CV5+CV13) by YE 2026 which will demonstrate the preliminary economics on lithium, caesium, and tantalum.**

Caesium Market

Caesium carbonate¹ spot price is currently above \$245/kg on SMM – increasing by more than 100% since June 2025.

Pollucite (caesium) mineral concentrate² price agreement reported in the public domain in February 2025 for \$300/t per 1% Cs₂O (5% minimum), when caesium carbonate was \$120/kg

Current primary supply of caesium is **highly concentrated³**, with users downstream interested in diverse supply chain development

99% Caesium Carbonate Price, USD/kg
(ex-works China)

Source: 1. SMM – Shanghai Metals Market; Spot pricing for caesium carbonate as traded on SMM as at April 27th, 2026 The market for caesium compounds and metals is largely opaque because it is typically not publicly traded like copper or gold, but rather through private bi-lateral and term contracts. Contract prices will therefore vary depending on contained caesium form, purity and end-product use 2: Grid Metals Sign Caesium Agreement with Tanco. https://gridmetalscorp.com/site/assets/files/5429/2025_02_18_tanco_agreement.pdf 3, The Global Caesium Industry – CPM. January 2026

Current and Future Uses of Caesium

Application	Market Size (Est. 2025): 1,520t contained Cs ₂ O	Market Characterization
Drilling Fluids (caesium formate brines)	47% of demand	High-pressure, high-temperature (HPHT) oil & gas wells.
Sulphuric Acid Catalysts	34% of demand	Used as a dopant to reduce SO ₂ emissions.
Fine Chemical Synthesis	15% of demand	Used as a sacrificial base in pharmaceutical manufacturing.

- In addition to established markets, growth potential from emerging applications – which can be supported from a new alternative supply source.
- Emerging applications include **the solar panel industry** where OxfordPV, a leading perovskite firm, **estimates the intensity is 40-50tpy of caesium per 100 GWh of solar capacity¹**.
 - Annual solar market currently is 600 GWh².
- **Efficiency improvements of almost 35%** have been seen in R&D for thin-film solar panels using a perovskite structure with caesium.
- **Potential for 500tpy in solid state batteries** on the lithium metal anode part of the battery³.

Lithium Market Dynamics

2025 Demand Picture + Long-Term BESS Tailwinds

- **Battery demand mix going towards BESS**, almost 4x larger market share by 2030 vs 2020.
 - BESS now represents approximately 35% of incremental lithium demand.
- **Total battery demand expected to triple** from 2025 to 2030 in Benchmark's high-case.
- Upside surprises that could further bolster lithium demand:
 - Buses, commercial and HD trucks
 - Boats and ferries
 - Drones
 - Humanoid Robots

Global lithium ion battery demand by all end use market

Long-Term Supply Gap Aligned with Shaakichiuwaanaan's Production Timeline

Targeted PMET commercial production for Phase 1 (2030) and Phase 2 (2032) aligned with supply gaps¹.

Supply and Demand, Upside Scenario

Source: Graph: Benchmark Minerals "Supply Demand Price Forecast Q4 2025". 1. Shaakichiuwaanaan full production of ≈ 100Kt/LCE or ≈ 800Kt/year of spodumene. Please refer to Feasibility Study (FS) NI 43-101 technical report.

Supply Issues Arising

- **Zimbabwe banned exports in February putting 11% of global lithium supply at risk¹.** Restrictions lifted on some operations; uncertain remains a clear hangover.
- **Low visibility on Jiangxi/Jianxiao Chinese supply resumption; 3-4% supply².**
- Strong demand will see supply increasing, but at what cost? UBS recently increasing their lithium price forecast³.

Lithium spodumene (6% Li₂O basis) price history, UBS & consensus forecasts

Demand Surprises – EV Trucks

- **China heavy-duty (HD) truck sales have nearly tripled in 2025².**
 - HD trucks accounted for over **5% of global Li-on battery demand** in 2025 (9% in China)².
 - Avg. battery pack size is almost **10x** the global avg. pack size per EV³.

China HD BEV avg. pack size

China HD EV sales by year

Price action similar to previous undersupplied cycles.

Source: 1. Bloomberg LCE Price History, as of April 29th 2026.

Upcoming Catalysts for PMET

PMET is entering a transformational period with multiple value-driving milestones across permitting, metallurgy, exploration, and commercial partnerships throughout 2026 and beyond.

1. Company anticipates a response to its application for a proposed 50 kt bulk sample program at CV5 in H1-2026. Subject to such a response and receipt of further required authorizations and funding, the Company aims to commence the bulk sample program toward the end of calendar year 2026.

PMET: A unique trifecta of in-demand critical minerals, based in Quebec with globally relevant partners, an experienced and successful team, fully funded to FID with near-term catalysts.

Annex

Matching Project Timeline to the Lithium Supply Gap

"Indicative timeline only. Actual timeframes may differ and be subject to change based on project conditions, timing for permitting and approvals and other external factors. It should not be relied upon as definitive or guaranteed. Refer to Slide 2 "Disclaimer and Forward Looking Statements" for further information."

Largest Lithium Pegmatite Reserve in the Americas

Mineral Reserve data sourced through November 13, 2025, from corporate disclosure of NI 43-101, JORC, or equivalent regulatory body. Deposit/Project data presented includes the total reserve tonnage. Shaakichiuwaanaan's CV5 Pegmatite hosts a Probable Mineral Reserve of 84.3 Mt at 1.26% Li₂O at a cut-off grade is 0.40% Li₂O (open-pit) and 0.70% Li₂O (underground). The Effective Date is September 11, 2025. Mineral Resources are inclusive of Mineral Reserves. See Slide 23 for further details.

Strong NPV Growth Driven by Rising Lithium Prices

Project NPV is highly sensitive to lithium spodumene concentrate pricing, with ~ C\$450M of NPV(8%) change per \$100/t increment in SC5.5 price¹. **At \$2000/t SC5.5, NAV per PMET share is \$27.**

Key Insight:

Robust lithium market fundamentals drive increasing project value, given overall sensitivity in the project to increased lithium price.

Tantalum & caesium co-products, CV13 expansion potential, are **NOT** included in the 2025 FS

1. See news release "PMET Resources Delivers Positive CV5 Lithium-Only Feasibility Study for its Large-Scale Shaakichiuwaanaan Project" dated October 20, 2025.

Track Record of Drilling Success and Project Progress

Largest lithium pegmatite reserve in the Americas delivered in under 4 years. We now begin 2026 with \$65M of flow-through funds to continue the exploration efforts

2021-2023: Foundation

- 2021: Discovery hole – 147 m @ 0.92% Li₂O (CF21-001)¹ November 2021
- 2022: Discovery of high-grade **Nova Zone**²
- 2023: **Maiden MRE (Inferred)** - largest in the Americas
- 362 Drill holes (~107,000 m) completed at the Shaakichiuwaanaan Property by the end of 2023

2024: Expansion

- Updated MRE: **Significant Indicated Resource determined**
- 431 holes (~128,000 m) completed to **support resource conversion to indicated and PEA achieved in August 2024**

2025: Continued Discovery at Scale

- **World's largest pollucite-hosted caesium pegmatite MRE determined.**
- MRE update and maiden **Mineral Reserve (Li) determined with FS released in October 2025, only 4 years after initial drill hole**
- 245 holes (~57,000 m) of drilling to support the FS

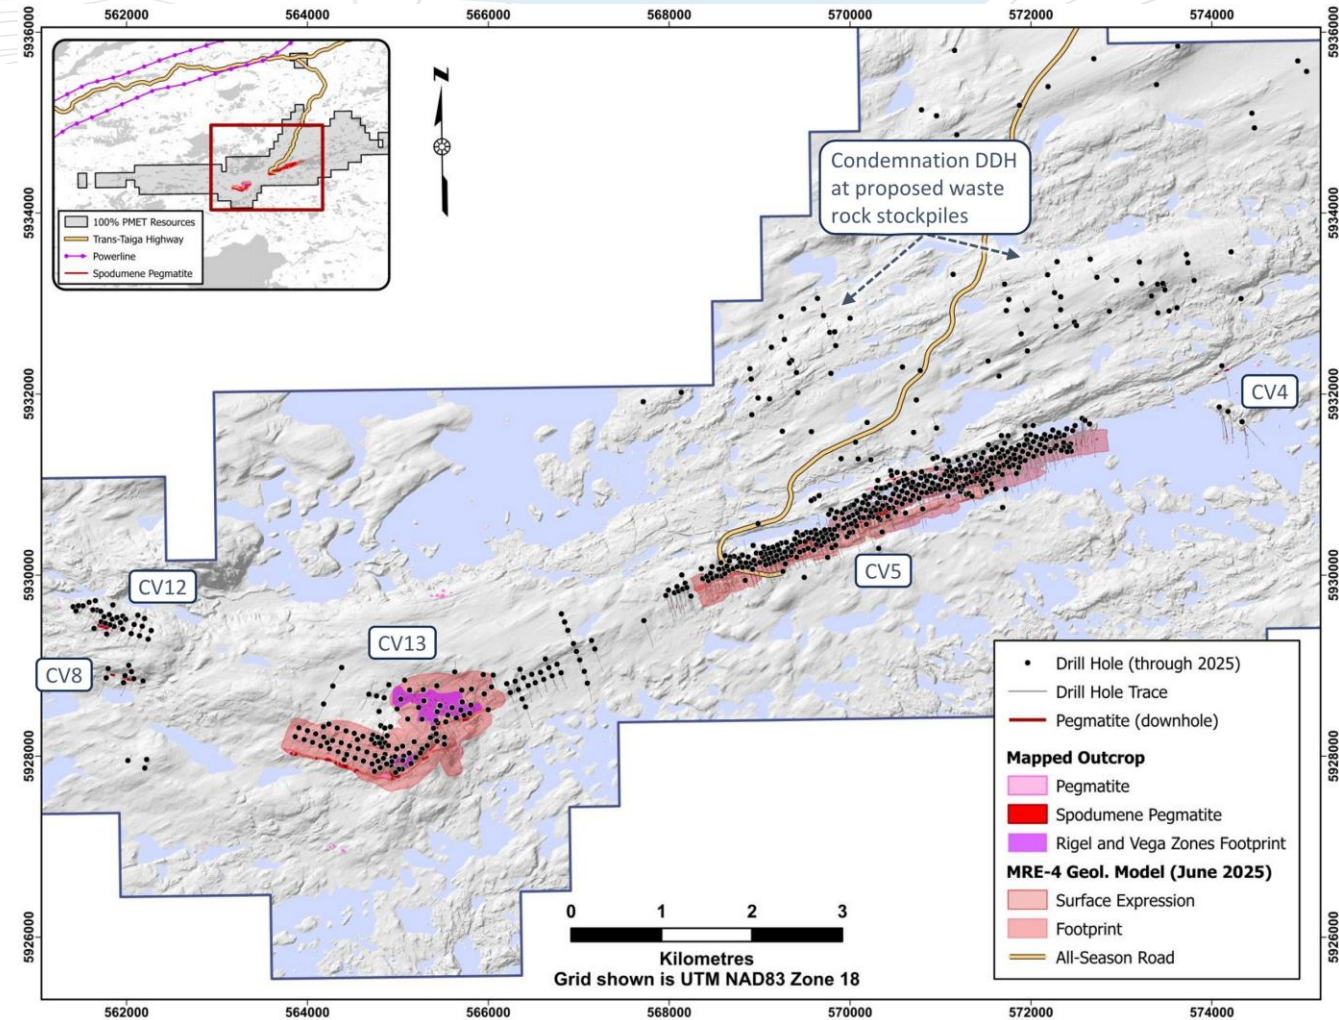

CV5, CV13, and Blue-Sky Potential

At Shaakichiuwaanaan, CV5 underpins our **lithium-only FS** and our maiden reserve. An **updated FS, scheduled for late 2026, will integrate the economics of tantalum at CV5 as a valuable co-product.**

A Preliminary Economic Assessment (PEA) on the broader Project (CV5+CV13) is also scheduled for late 2026 and will include the full LCT spectrum: lithium, caesium and tantalum.

Important Information

This presentation (together with oral statements made in connection herewith, this “Presentation”) is dated May 1st, 2026, and has been prepared by PMET Resources Inc (the “Company”) and is authorised for release by Managing Director, Ken Brinsden. This Presentation and the information contained herein is for information purposes only, and all recipients agree that they will use this presentation solely for information purposes.

SUMMARY INFORMATION

This Presentation contains summary information about the current activities of the Company and its subsidiaries (the “Group”) which is current as at the date of this Presentation unless otherwise indicated. The information in this Presentation is of a general nature and does not purport to be complete or exhaustive. For greater certainty, this Presentation should be read in conjunction with the Company’s other periodic and continuous disclosure releases, available from SEDAR+ or the ASX, including the detailed risk discussion in the Company’s most recent Annual Information Form filed on SEDAR+ and with the ASX.

Certain market and industry data used in this Presentation may have been obtained from research, surveys or studies conducted by third parties, including industry or general publications. None of the Group nor its advisers or representatives have independently verified any such market or industry data provided by third parties or industry or general publications.

No member of the Group gives any representations or warranties, express or implied, in relation to the statements or information in this Presentation.

Readers should not construe the contents of this document as legal, tax, regulatory, financial or accounting advice and are urged to consult with their own advisers in relation to such matters. You should consult your own advisers as needed to make a future investment decision and determine whether you are legally permitted to make an investment under applicable legal requirements, including securities or similar laws or regulations.

NO FINANCIAL PRODUCT ADVICE

This Presentation is for information purposes only and is not a prospectus, offering memorandum disclosure document, product disclosure statement or other offering document under Canadian law, Australian law or the law of any other jurisdiction. This Presentation is not financial product advice or investment advice nor a recommendation to acquire, and should not be construed to constitute an offer to sell or the solicitation of an offer to buy, any securities. This Presentation shall not form the basis for or be used for any such offer or solicitation or other contract or engagement in any jurisdiction. An investment in Company securities is subject to known and unknown risks, some of which are beyond the control of the Group. Each recipient should undertake its own independent evaluation of the Group and conduct its own inquiries as to the adequacy, accuracy and completeness of the information contained herein. Readers should not construe the contents of this Presentation as legal, tax, regulatory, financial or accounting advice and are urged to consult with their own advisors in relation to such matters.

CURRENCY

Unless otherwise indicated all references to \$ or CA\$ in this release are to Canadian dollars. A foreign exchange rate of CA\$1.00 = US\$0.75 has been used over the life of mine. On February 19, 2026, the daily exchange rate recorded by the Bank of Canada was CA\$1.00 = 0.7303.

ROUNDING

Certain figures, percentages, estimates, calculations of value and fractions provided in this Presentation are subject to the effect of rounding. Accordingly, the actual calculation of these figures may differ from the figures set out in the Presentation.

DISCLAIMER AND FORWARD-LOOKING STATEMENTS

This Presentation contains “forward-looking information” or “forward-looking statements” within the meaning of applicable securities laws.

All statements, other than statements of present or historical facts, are forward-

looking statements. Forward-looking statements involve known and unknown risks, uncertainties and assumptions and accordingly, actual results could differ materially from those expressed or implied in such statements. You are hence cautioned not to place undue reliance on forward-looking statements. Forward-looking statements are typically identified by words such as “plan”, “development”, “growth”, “continued”, “positioning”, “expectations”, “estimated”, “future”, “demand”, “upcoming”, “growth”, “rising”, “blue-sky”, potential, “strategy” or variations of such words and phrases or statements that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved. Forward-looking statements in this Presentation include, but are not limited to, statements concerning the future demand and prices for lithium, tantalum and caesium, the project’s supply potential, our development strategy, project economics, financial and operational parameters such as expected throughput, production, processing methods, cash costs, all-in sustaining costs, other costs, capital expenditures, free cash flow, NPV, IRR, payback period and life of mine, blue-sky potential, opportunities for growth and expected next steps in the development of the project, including the timing of the FID and commissioning and future work and optimization, the economic potential of the Shaakichiuwaanaan Project, markets’ dynamics, upcoming catalysts, the future uses of tantalum and caesium, the regulatory approval processes, including the proposed permitting and development timeline, the opportunities for additional conversion at CV5 and CV13, the anticipated production rate, the potential for the Shaakichiuwaanaan Project to become a cornerstone supplier to the battery supply chains, NPV growth, the upcoming updates, including drill program results, and the release of further project economic studies.

Important Information

Although the Company believes its expectations are based upon reasonable assumptions and has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Key assumptions upon which the Company's forward-looking information is based include without limitation, assumptions regarding development and exploration activities; the timing, extent, duration and economic viability of such operations, including any mineral resources or reserves identified thereby; the ability to achieve production and the timing thereof; the accuracy and reliability of estimates, projections, forecasts, studies and assessments; the Company's ability to meet or achieve estimates, projections and forecasts; the availability and cost of inputs; the price and market for outputs; foreign exchange rates; taxation levels; the timely receipt of necessary approvals or permits; the ability to meet current and future obligations; the ability to obtain timely financing on reasonable terms when required; the current and future social, economic and political conditions; and other assumptions and factors generally associated with the mining industry. Readers are cautioned that the foregoing list is not exhaustive of all factors and assumptions which may have been used.

Forward-looking statements are also subject to risks and uncertainties facing the Company's business, any of which could have a material adverse effect on the Company's business, financial condition, results of operations and growth prospects. Some of the risks the Company faces and the uncertainties that could cause actual results to differ materially from those expressed in the forward-looking statements include, among others, requirements for additional capital, operating and technical difficulties in connection with mineral exploration and development activities; actual results of exploration activities, including on the Shaakichiuwaanaan Project; the estimation or realization of mineral reserves and mineral resources; the timing and results of estimated future production; the costs of production, capital expenditures, the costs and timing of the development of new deposits, requirements for additional capital; future prices of spodumene;

changes in general economic conditions; changes in the financial markets and in the demand and market price for commodities; lack of investor interest in future financings; the Company's ability to secure permits or financing for the completion of construction activities; governmental and environmental approvals; the potential for major economies to encounter a slowdown in economic activity or a recession; and the Company's ability to execute on plans relating to the Shaakichiuwaanaan Project. In addition, readers should review the detailed risk discussion in the Company's most recent Annual Information Form filed on SEDAR+, with the ASX and available on the Company's website for a fuller understanding of the risks and uncertainties that affect the Company's business and operations. These risks are not exhaustive; however, they should be considered carefully. If any of these risks or uncertainties materialize, actual results may vary materially from those anticipated in the forward-looking statements found herein.

Forward-looking statements contained herein are presented for the purpose of assisting investors in understanding the Company's business plans, financial performance and condition and may not be appropriate for other purposes.

The forward-looking statements contained herein are made only as of the date hereof. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except to the extent required by applicable law. The Company qualifies all of its forward-looking statements by these cautionary statements.

Non-IFRS and other financial measures

This Presentation includes non-IFRS financial measures and non-IFRS financial ratios. The Company believes that these measures provide additional insight, but these measures are not standardized financial measures prescribed under IFRS and therefore should not be confused with, or used as an alternative for, performance measures calculated according to IFRS. Furthermore, these measures should not be compared with similarly titled measures provided or used by other issuers.

The non-IFRS financial measures and non-IFRS financial ratios used in this Presentation and common to the mining industry are defined below:

- Cash operating costs at site and cash operating costs at site per tonne: Cash operating costs at site is a non-IFRS financial measure which includes mining, processing, and site administration. Cash operating costs at site per tonne is a non-IFRS financial ratio which is calculated as cash operating costs at site divided by anticipated production expressed in tonnes. These measures capture the important components of the Company's anticipated production and related costs and are used to indicate anticipated cost performance of the Company's operations.
- Total cash operating costs (DAP Grande-Anse as POL) and total cash operating costs per tonne (DAP Grande-Anse as POL): Total cash operating costs (DAP Grande-Anse as POL) is a non-IFRS financial measure which includes mining, processing, site administration, and product transportation to Grande-Anse. Total cash operating costs (DAP Grande-Anse as POL) per tonne is a non-IFRS financial ratio which is calculated as total cash operating costs (DAP Grande-Anse as POL) divided by anticipated production expressed in tonnes. These measures capture the important components of the Company's anticipated production and related costs and are used to indicate anticipated cost performance of the Company's operations.
- All-in sustaining cost (AISC) and AISC per tonne: All-in sustaining cost is a non-IFRS financial measure which includes mining, processing, site administration, and product transportation to Grande-Anse and sustaining capital. All-in sustaining cost per tonne of spodumene concentrate is a non-IFRS financial ratio which is calculated as all-in sustaining cost divided by anticipated production expressed in tonnes. These measures capture the important components of the Company's anticipated production and related costs and are used to indicate anticipated cost performance of the Company's operations.

The Company does not currently have operations and therefore does not have historical equivalent measures to compare and cannot therefore reconcile with historical measures.

Important Information

NI 43-101 AND JORC CODE (2012 EDITION)

Mineral Reserve and Mineral Resource estimates and Exploration Results are reported in accordance with Canadian National Instrument 43-101 - Standards of Disclosure for Mineral Projects (NI 43-101) and the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code (2012 Edition)).

Readers outside of Australia and Canada should note that they may not comply with the relevant guidelines in other countries and, in particular, may not comply with Item 1300 of Regulation S-K, which governs disclosures in registration statements filed with the SEC. NI 43-101 differs significantly from the disclosure requirements of the SEC generally applicable to US companies, and therefore information contained in this Presentation describing mineral deposits, resources and reserves is not comparable to similar information made public by companies subject to the reporting and disclosure requirements of US securities laws.

QUALIFIED PERSONS (QP) / COMPETENT PERSONS (CP)

Mr. Darren L. Smith, M.Sc., P.Geo., who is a Qualified Person as defined by National Instrument 43-101, and Competent Person as defined by the JORC Code 2012, and member in good standing with the Ordre des Géologues du Québec (Geologist Permit number 1968), and with the Association of Professional Engineers and Geoscientists of Alberta (member number 87868), has reviewed and approved, or has prepared, as applicable, the disclosure of the exploration results and Mineral Resource technical information contained in this Presentation and has confirmed that the relevant information is an accurate representation of the available data and studies for the Shaakichiuwaanaan Project.

Mr. Smith is an Executive and Vice President of Exploration for PMET Resources Inc. and holds common shares, options, Restricted Share Units (RSUs), and Performance Share Units (PSUs) in the Company.

Mr. Frédéric Mercier-Langevin, Ing. M.Sc, who is a Qualified Person as defined by National Instrument 43-101, and Competent Person as defined by the JORC Code 2012, and member in good standing of Ordre des Ingénieurs du Québec (OIQ), has reviewed and approved, or has prepared, as applicable, the disclosure of the scientific and technical information contained in this Presentation and has confirmed that the relevant information is an accurate representation of the available data and studies for the Shaakichiuwaanaan Project.

Mr. Mercier-Langevin is the Chief Operating and Development Officer for PMET Resources Inc. and holds common shares, options, RSUs, and PSUs in the Company.

ASX COMPETENT PERSON STATEMENTS – SHAAKICHIUWAANAAN PROJECT

THE INFORMATION IN THIS PRESENTATION WITH RESPECT TO THE FEASIBILITY STUDY (FS) was first released by the Company in its news release dated October 20, 2025, titled "PMET Resources Delivers Positive CV5 Lithium-Only Feasibility Study". The Company confirms that all material assumptions underpinning the production target and forecast financial information derived from the production target in the FS news release continue to apply and have not materially changed.

THE INFORMATION IN THIS PRESENTATION WITH RESPECT TO THE CV5 PEGMATITE MINERAL RESERVE ESTIMATE was reported by the Company in accordance with ASX Listing Rule 5.9 on October 20th, 2025. The Company confirms it is not aware of any new information or data that materially affects the information included in the announcement and that all material assumptions and technical parameters underpinning the estimate in the announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the competent person's findings are presented have not been materially modified from the original market announcement.

THE INFORMATION IN THIS PRESENTATION WITH RESPECT TO THE CONSOLIDATED MINERAL RESOURCE ESTIMATE was reported by the Company in accordance with ASX Listing Rule 5.8 on July 21, 2025. The Company confirms it is not aware of any new information or data that materially affects the information included in the announcements and that all material assumptions and technical parameters underpinning the estimates in the announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the competent person's findings are presented have not been materially modified from the original market announcements.

THE INFORMATION IN THIS PRESENTATION WITH RESPECT TO EXPLORATION RESULTS was reported by the Company in accordance with ASX Listing Rule 5.7 on June 25, 2025, September 24, 2025, December 15, 2025 and February 19, 2026. The Company confirms it is not aware of any new information or data that materially affects the information included in the announcement. The Company confirms that the form and context in which the competent person's findings are presented have not been materially modified from the original market announcement.

NI 43-101 Mineral Resource Statement

CV5 AND CV13 PEGMATITES

Consolidated MRE

Conceptual Mining Constraint	Pegmatite	Classification	Tonnes (t)	Li ₂ O (%)	Cs ₂ O (%)	Ta ₂ O ₅ (ppm)	Ga (ppm)	Contained LCE (Mt)
Open-Pit	CV5	Indicated	97,757,000	1.39	0.09	163	66	3.35
Underground			4,071,000	1.08	0.06	186	66	0.11
Total			101,828,000	1.38	0.09	164	66	3.46
Open-Pit	CV5	Inferred	5,745,000	1.16	0.09	163	61	0.17
Underground			8,153,000	1.24	0.07	136	60	0.25
Total			13,898,000	1.21	0.08	147	60	0.41
Open-Pit	CV13	Indicated	5,996,000	1.89	0.60	201	76	0.28
Underground			167,000	0.85	0.06	132	60	0.00
Total			6,163,000	1.86	0.59	199	76	0.28
Open-Pit	CV13	Inferred	18,020,000	1.44	0.32	168	70	0.64
Underground			1,462,000	1.05	0.08	75	55	0.04
Total			19,482,000	1.41	0.30	161	69	0.68
CV5 + CV13		Indicated	107,991,000	1.40	0.11	166	66	3.75
		Inferred	33,380,000	1.33	0.21	155	65	1.09

Caesium Zone MRE

Caesium Zone	Classification	Tonnes (t)	Cs ₂ O (%)	Li ₂ O (%)	Ta ₂ O ₅ (ppm)	Contained Cs ₂ O (t)
Rigel	Indicated	163,000	10.25	1.78	646	16,708
	Inferred	-	-	-	-	-
Vega	Indicated	530,000	2.61	2.23	172	13,833
	Inferred	1,698,000	2.40	1.81	245	40,752
Rigel + Vega	Indicated	693,000	4.40	2.12	283	30,541
	Inferred	1,698,000	2.40	1.81	245	40,752

The Consolidated MRE cut-off grade is variable depending on the mining method and pegmatite (0.40% Li₂O open-pit, 0.60% Li₂O underground CV5, and 0.70% Li₂O underground CV13). A grade constraint of 0.50% Cs₂O was used to model the Rigel and Vega caesium zones, which are entirely within the CV13 Pegmatite's open-pit mining shape. The Effective Date of the MREs is June 20, 2025 (through drill hole CV24-787). Mineral Resources are not Mineral Reserves as they do not have demonstrated economic viability. Mineral Resources are inclusive of Mineral Reserves.

NI 43-101 Mineral Reserve Statement

CV5 PEGMATITE

Area	Classification	Tonnes (Mt)	Li ₂ O (%)	Contained LCE (t)
Open-Pit	Proven	-	-	-
	Probable	49.2	1.12	1.36
Underground	Proven	-	-	-
	Probable	35.1	1.45	1.26
	Proven	-	-	-
	Probable	84.3	1.26	2.62

Cut-off grade of 0.40% Li₂O (open-pit) and 0.70% Li₂O (underground). Underground development and open pit marginal tonnage containing material above 0.37% Li₂O are also included in the statement. Effective Date of September 11, 2025.
